

Mobile Computers | Printers | Scanners | Tablets

Printers

Boost productivity and accuracy. Use Zebra printers to know more about the assets and data that flow through operations and make better decisions.

Mobile Printers

Zebra wireless receipt and mobile label printers boost employee productivity and accuracy. Workers can print barcode labels, receipts or tickets quickly and efficiently, at any time and any place.

With IP ratings up to IP54 and drop specifications up to 6ft to concrete, Zebra mobile printers can withstand harsh and demanding environments, inside or outside the four walls.

The ZQ, iMZ and QLn series of mobile printers are compatible with Apple iOS, Android and Windows operating systems, making them easy to pair with the latest smartphone, PDA or tablet. The QLn 220/320 is also available with a disinfectant casing, tailored specifically for healthcare environments.

ZQ320
(outside model)

Desktop Printers

Zebra's portfolio of compact, yet feature rich desktop label printers are ideal for environments with limited space, but require high-quality, reliable direct thermal or thermal transfer printing.

From the entry level ZD420 to the performance ZD620 desktop range, Zebra printers are engineered for ease-of-use, and offer a broad range of connectivity options, making them ideal for countless label, receipt or wristband printing applications.

The latest addition to the range, are the ZD420 and ZD620. The ZD420 is the ideal desktop printer to replace the GK420t and GT800. The ZD620 is the right choice for migrating from GX Series and ZD500 printer models.

ZD420

Tabletop Printers

Zebra's tabletop range offers the best in industrial label printing, with unparalleled barcode, text and graphics print quality on labels, invoices and packing slips.

These printers have been designed to survive the harshest industrial environments. With metal frames and the ability to print from 2,500 to a constant throughput of labels, they can perform consistently in 24/7, mission-critical operations.

Zebra also offer state-of-the-art RFID encoding options available to further advance process efficiency and accuracy throughout the supply chain.

ZT610

Card Printers

Zebra card printing solutions offer improved access control, EU regulation compliant and secure ID badges. Choose from a broad range of single or dual sided colour card printers. Card printing options range from wired and wireless network connectivity, smart card and magnetic stripe encoding and lamination for higher security and card durability.

From entry level to high performance printing, Zebra's product range can fulfill business needs for payment cards, food safety cards, driver's licences, membership cards, employee identification badges or gift cards to name a few.

Zebra Certified Supplies

Zebra Certified Supplies gives you access to a large selection of quality, pre-tested, stock and custom supplies manufactured by printing technology experts. By using Zebra Certified Supplies you can avoid printing and scanning issues which can occur with non-Zebra supplies.

The ZipShip range consists of a range of the most popular labels, tags and ribbons. Zebra is one of the largest label converters in Europe, so buy raw materials at very competitive rates and drive manufacturing costs down as low as possible, which means that your business can benefit from low prices for top-quality products.

Zebra ZipShip products are made in large production runs, so even small orders are competitively priced. Plus choosing the right ZipShip product is easy with the online ZipShip selector tool, available at: <http://www.zebrazipship.com/>

Find the correct materials for your printing applications here:
<http://supplies.zebra.com>

I ♥ Zebra
ZipShipSM

Label Design Software

Label design software offers complete design and print solutions for your business which are affordable and easy-to-use.

BarTender software by Seagull Scientific enables organisations around the world to improve safety, security, efficiency and compliance by creating and automating labels, barcodes, RFID tags, plastic cards and more.

BY SEAGULL SCIENTIFIC

 **ZEBRA**

ZebraDesigner Pro has been updated to make designing labels “click” simple. Offering the most frequently used label design features as well as easy-to-use printer configuration tools.

Link-OS Environment

Demand is growing for devices that are mobile, intelligent and connected to the Cloud. This emerging need calls for new technologies and solutions. In response, Zebra has created the innovative Link-OS environment: an open platform that pairs an operating system for smart Zebra devices with powerful software apps, making the devices easy to integrate, manage and maintain from any location.

Virtual Devices enable using legacy command languages with Link-OS printers. By treating legacy command languages as on-printer applications, Virtual Devices enable printers to deliver support for a variety of languages, while still delivering the advantages that Link-OS brings to your business processes.

Make applications and Zebra devices easier to use with **Print Touch**. Using Near Field Communication (NFC), Print Touch enables new experiences and quick access to helpful information. Print Touch devices offer app and webpage launching features, making it easy to access information and product support.

Profile Manager manages all aspects of Link-OS printers. There's no need to switch between applications to get the job done and printer management is possible from anywhere. View the console on PCs, tablets and smartphones - all with a user interface that is simple and straightforward.

The **Print Station** application enables printing from Android tablets and smartphones, providing an easy alternative to using a physical Keyboard Display Unit (KDU). Users can create WYSIWYG designs in the free, Windows-based ZebraDesigner product – export them and print directly from the Print Station app.

Cloud Connect allows Link-OS printers to interact with the Cloud, forwarding data from any port. These printers become an integral part of an overall Cloud strategy and an important component of any Internet of Things solution - today, or in the future.

The robust multiplatform **Software Development Kit** enables app creation on PCs, smartphones and tablets supporting the most popular operating systems. The Link-OS SDK makes creating powerful apps simple and straightforward.

Mobile Computers

Maximise productivity, efficiency and customer service in a class of its own with our mobile computer range from Zebra.

Handheld Computers

Zebra mobile computers have all the right features: blazing performance, all day everyday reliability, WiFi and cellular secure wireless communications, easy centralised management and support plans that cover literally everything.

With a wide range of products to suit every industry from retail and warehousing to healthcare and government, offering different display options, operating systems, IP ratings and data capture options, we can help you find the perfect device for your specific requirement.

The TC20 mobile computer has the right looks, the right business features and the right price. Built to survive where work gets done, the ruggedised TC20 features an integrated barcode scanning, push-to-talk and optional snap-on power pack to keep your businesses running.

TC20

Enterprise Tablets

Zebra tablets deliver the consumer styling workers are used to with the enterprise class features needed to get the job done - inside the four walls or out in the field.

The ET50/55 is a flexible business tablet customisable for just about any job and any environment. With a choice of Android 5.1 or Windows 10 OS, a rugged frame for extra durability, IP65 rating, two display size options, NFC and fast WiFi, plus the ET55 is GPS and 4G enabled.

ET50/55

Vehicle Mounted Computers

Maximise productivity and deliver flawless fulfillment in even the most challenging warehouse environments with Zebra vehicle mounted computers.

The VC80 gives operators in material handling vehicles mobile access to desktop applications to complete tasks faster and more accurately. Get full Windows support in a super rugged design built for the toughest indoor and outdoor environments, plus the fastest wireless connections available, compact design and flexible mounting options.

VC80

Wearable Computers

Zebra's wearable computers in conjunction with ring scanners and headsets offer a total wearable solution. The WT41N0 arms workers with advanced real-time hands-free voice and data, providing information to improve decision-making and customer satisfaction. The WT6000 Android 5.1 rugged wearable computer is easily attached to an arm brace or hip mount and supports tap to pair NFC technology to easily connect to Bluetooth ring scanners and headsets. Plus, the WT6000 and RS6000 ring scanner share the same battery, and both devices can be charged in a singular modular cradle - without removing the batteries.

WT6000

Zebra's industry-leading Mobility DNA toolkit improves virtually every aspect of enterprise-class wearable solutions.

Barcode Scanners

With a Zebra scanner in hand, workers can capture the data that matters most - as fast and as accurately as possible.

General Purpose Scanners

Zebra's general-purpose scanners are designed to meet a wide range of scanning needs, applications and budgets.

With an extensive range of handheld and hands-free scanners, Zebra has the perfect scanner for your business needs, whether that be for retail point-of-sale, at the patient bedside, on the manufacturing production line or in the aisles of a warehouse.

Zebra's scanning technology allows workers to capture virtually any barcode in a split second, even if it's on the screen of a mobile phone or printed on a label that is dirty or damaged. With features such as 1D and 2D scanning, PDF417 scanning, image and signature capture, RFID tag reading, direct part marks (DPM), special barcodes (MICR) and even optical character recognition (OCR) for document capture.

DS2208

Ultra-Rugged Scanners

The 3600 ultra-rugged scanner series is the industry's first complete line of corded and cordless ultra-rugged scanners that redefine industrial scanning with new standards for rugged design, scanning performance and manageability.

All scanners in this family offer a 2.4m drop spec and an IP67 sealing, making this range dust-tight and waterproof. Delivering unmatched user experience, the Bluetooth 4.0 Low Energy provides lightning fast wireless communications and maximum energy efficiency.

With six models to choose from, there is a 3600 model designed to meet the specific scanning needs in the warehousing or manufacturing industries.

Li3608 ER/3678 ER

Companion Scanners

Companion scanning devices are the easy way to add enterprise-class scanning to any mobile device. If workers are using tablets, laptops or smartphones, they all share a common challenge - the consumer-grade camera used to capture barcodes makes scanning slow, uncomfortable and impossible unless the barcode is perfect.

Zebra companion scanners enable the Enterprise to easily implement 1D or 2D scanning and solve this issue. These devices are affordably priced and fit in a pocket or clipped to a lanyard.

123Scan²

The 123Scan² scanner configuration utility is a free, easy-to-use, Windows based software tool for configuring scanners and optimising their performance.

In an industry first, updating firmware no longer involves lost settings that prevent scanners from communicating with its host - 123Scan² preserves and automatically reloads pre-upgrade settings.

The utility also allows scanned barcode data to be viewed, capture images, view firmware release notes and access scanner asset tracking information.

Scanner Management Service (SMS) Utility

Remotely manage entire scanner fleets from any location and drive down scanner management costs. The robust complementary solution allows parameters to be remotely set, update firmware and access scanner asset information and statistics.

Scanner SDK

Easily create fully featured applications with the Scanner SDK. In addition to capturing barcode data, the SDK enables image capture, beeper and LED control parameters to be easily set and upgrades made. The SDK also allows multiple applications to run on one PC, talking to one or more scanners simultaneously.

Mobility DNA

Zebra's Mobility DNA is the industry's most comprehensive suite of mobility must-haves. Connect every strand of a mobility platform for a simplified, integrated solution using Zebra's full line of mobile computers, off-the-shelf, user apps, robust administration utilities and effortless app development tools.

Implementation, management, security and operations are streamlined from the start, so workers are more productive, ROI is accelerated, and customers are satisfied. Below is a subset of the full Mobility DNA offering.

APPLICATIONS:

Lower risk and expense with purpose built ready-to-use enterprise applications – all backed by Zebra. Trust these vetted industry-specific applications to help optimise productivity and operations.

AppGallery

TekSpeech Pro

Workforce Connect

DEVELOPMENT TOOLS:

Gain the ease of consumer smartphone platforms, without sacrificing the critical data functionality of enterprise solutions. Building, promoting, and delivering applications is the backbone of Zebra ISV's. Zebra's goal is to make their job easier and more efficient.

EMDK for Android

Enterprise Browser

Mobility Extensions

Stage Now

UTILITIES:

Zebra's robust set of utilities enables companies to gain simpler management, tighter security, and enhanced product performance. Which collectively keeps workers – and business – moving forward.

SimulScan Document Capture

All-touch Terminal Emulation (TE)

PowerPrecision Battery

Swipe Assist

Zebra OneCare Service Contract

Ensure you get the very best from your Zebra products with Zebra OneCare service contracts. All OneCare service covers the labour, spare parts and preventative maintenance (and, where applicable, printheads and transport) needed to bring products back to full operation. By safeguarding Zebra printers, mobile devices or scanners with OneCare, you can be assured a Zebra product expert will quickly repair and return the device in working order.
